241016 / FoF5 · z=35 (zero-based)
180 labels intersect this view · Green only 25 · Red only 14 · Both reporters 1 · Unresolved 140

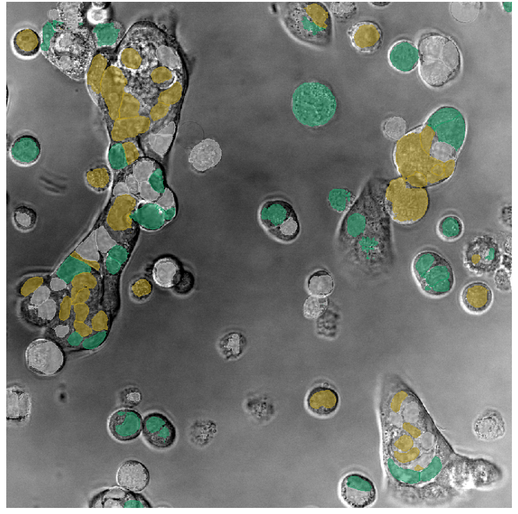

A Green + red fluorescence
White outlines: dominant components

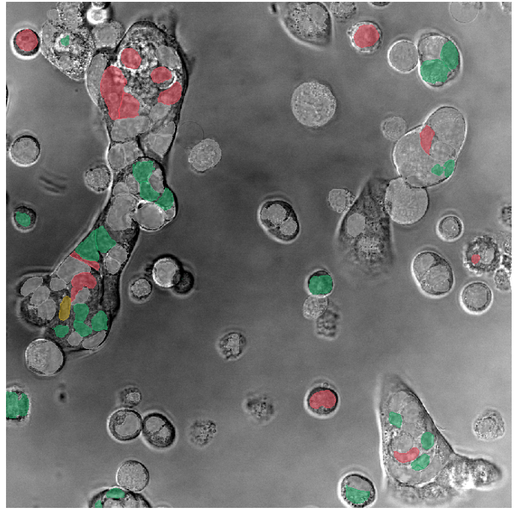

C1 Old absolute gates
Original supplied phase labels

C2 Previous mixture model
Original uncertainty retained

D New local reporter states
Weak, unstable or flagged masks unresolved

C1/C2 phase labels
G1 G1S S G2M uncertain qc review

D reporter states
Green only Both reporters
Red only Unresolved

Calls use 3D measurements. Fixed fluorescence display ranges across views. All 578 labels retained in the full-stack results.
Reporter states are provisional image-based calls; biological phase and unreviewed mask identity remain unvalidated.
