241016 / FoF 5 — z=35 (zero-based)
Largest component per original mask label; n=578 in the full 3D stack

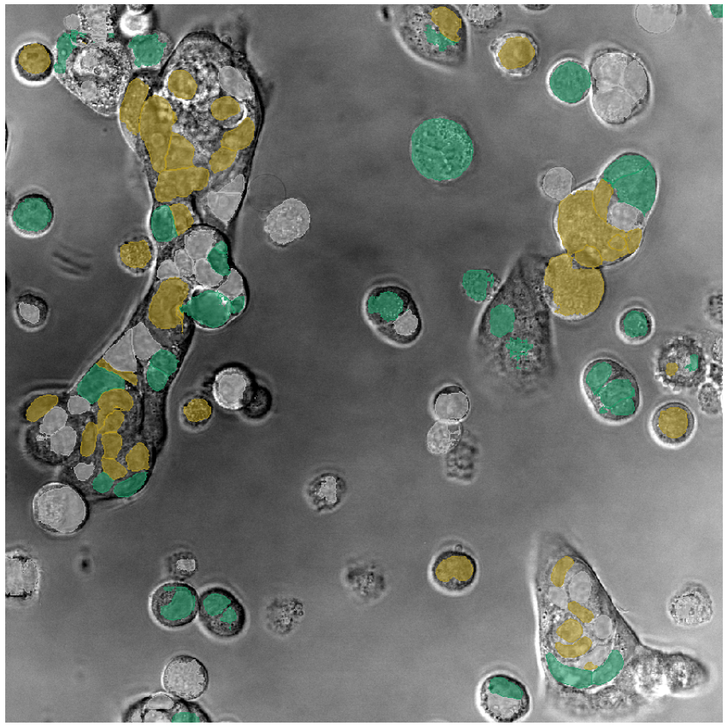

A Green + red fluorescence
White outlines: selected segmentation masks

C1 Supplied phase thresholds
180 selected units intersect this plane

C2 Refitted candidate
Uncertainty and QC retained

G1S G1 S G2M uncertain qc review

Phase assignments use full 3D measurements. Fixed display stretches across all panels and slices; native image/mask coordinates.
C1: green gate 0.003; red gate 0.0095. Only the selected measurement units are colored. C2 is provisional.
