241016 / FoF5 · z=35 (zero-based)
180 intersecting labels · Green only 41 · Red only 31 · Both 5 · Neither 103

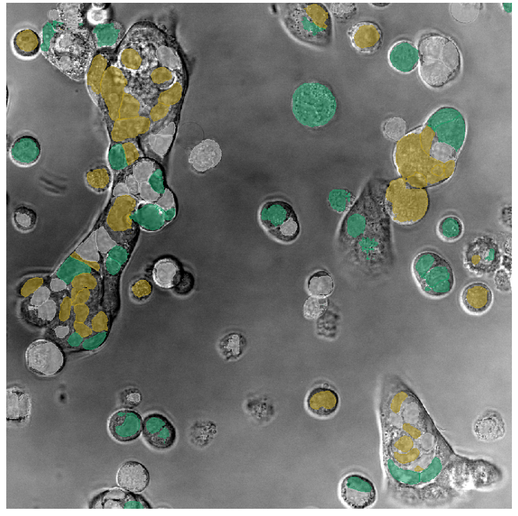

A Green + red fluorescence
White outlines: dominant components

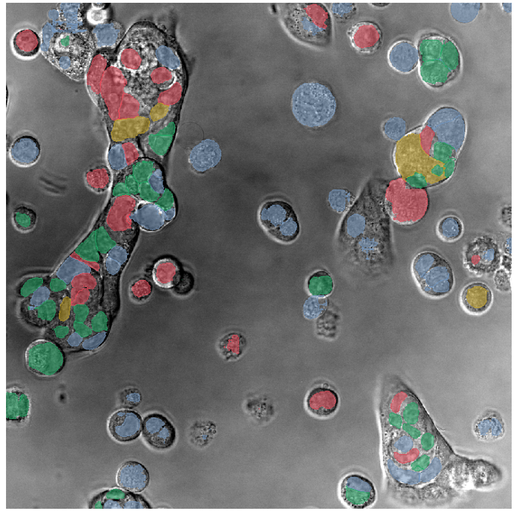

C1 Old absolute gates
Original phase labels

C2 Previous mixture model
Original uncertainty retained

D Forced reporter states
Every label assigned to one of four states

C1/C2 phase labels

G1 G1S S G2M uncertain qc review

D forced reporter states

Green only Both
Red only Neither

3D local fluorescence compared with fitted point thresholds. Neither = below both thresholds. No uncertainty or QC abstention.
Fixed fluorescence display ranges. Quality and stability flags remain in the exported table.
