241016 / FoF5 · z=15 (zero-based)
299 intersecting labels · Green only 57 · Red only 49 · Both 12 · Neither 181

A Green + red fluorescence
White outlines: dominant components

D Forced reporter states
Every label assigned to one of four states

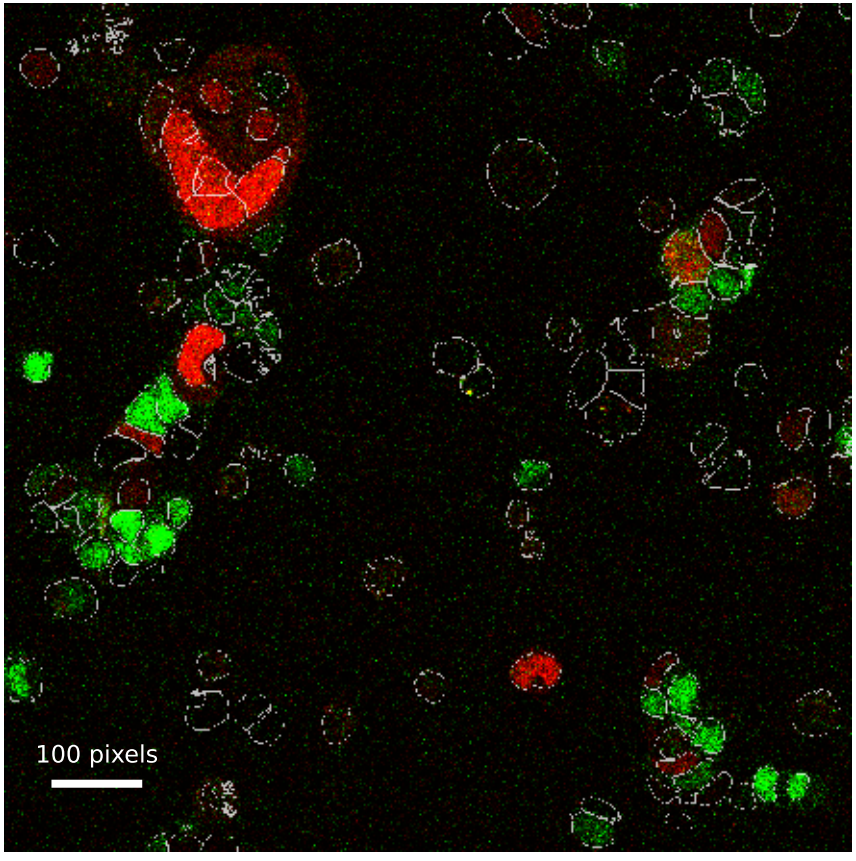

Green only Red only Both Neither

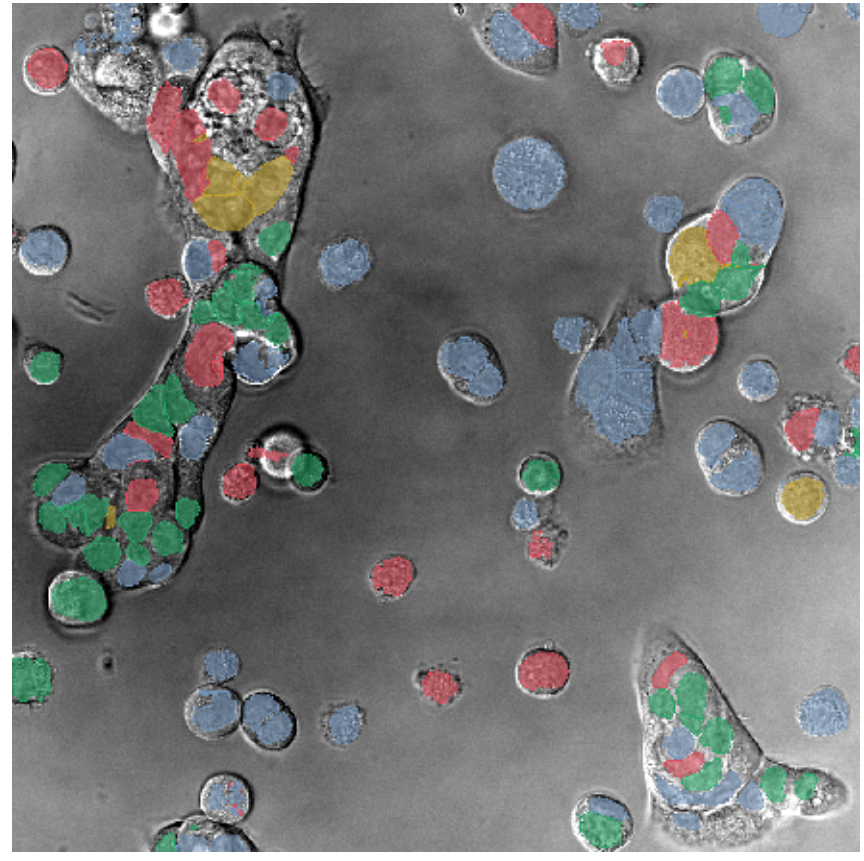

3D local fluorescence compared with fitted point thresholds. Neither = below both thresholds. No uncertainty or QC abstention.
Fixed fluorescence display ranges. Quality and stability flags remain in the exported table.

241016 / FoF5 · z=25 (zero-based)
224 intersecting labels · Green only 47 · Red only 43 · Both 12 · Neither 122

A Green + red fluorescence
White outlines: dominant components

D Forced reporter states
Every label assigned to one of four states

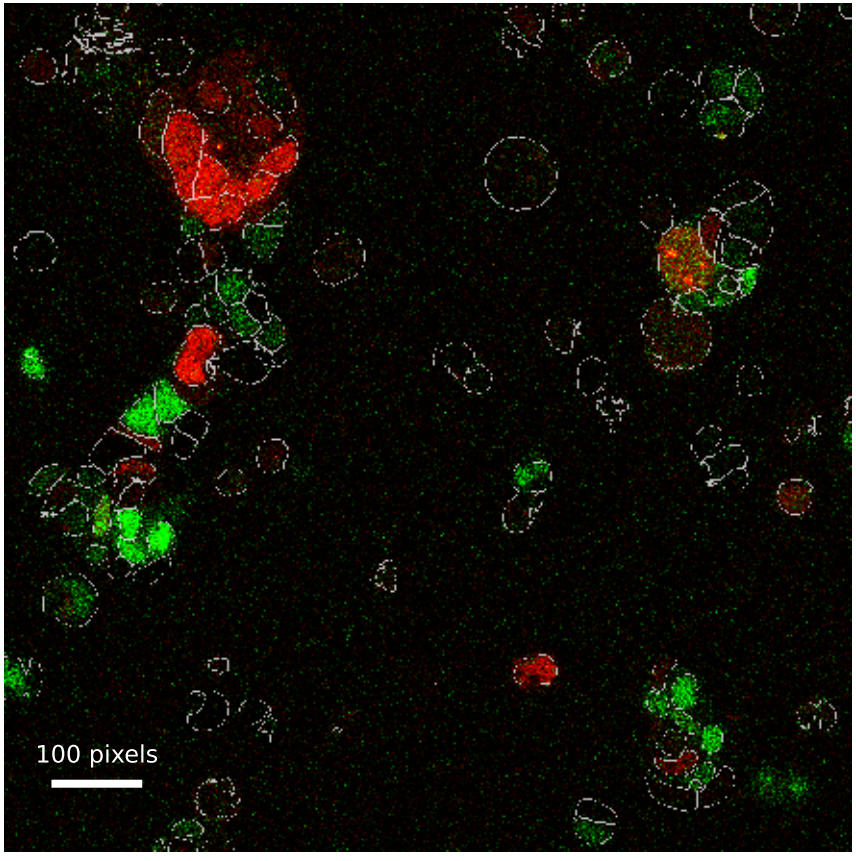

Green only Red only Both Neither

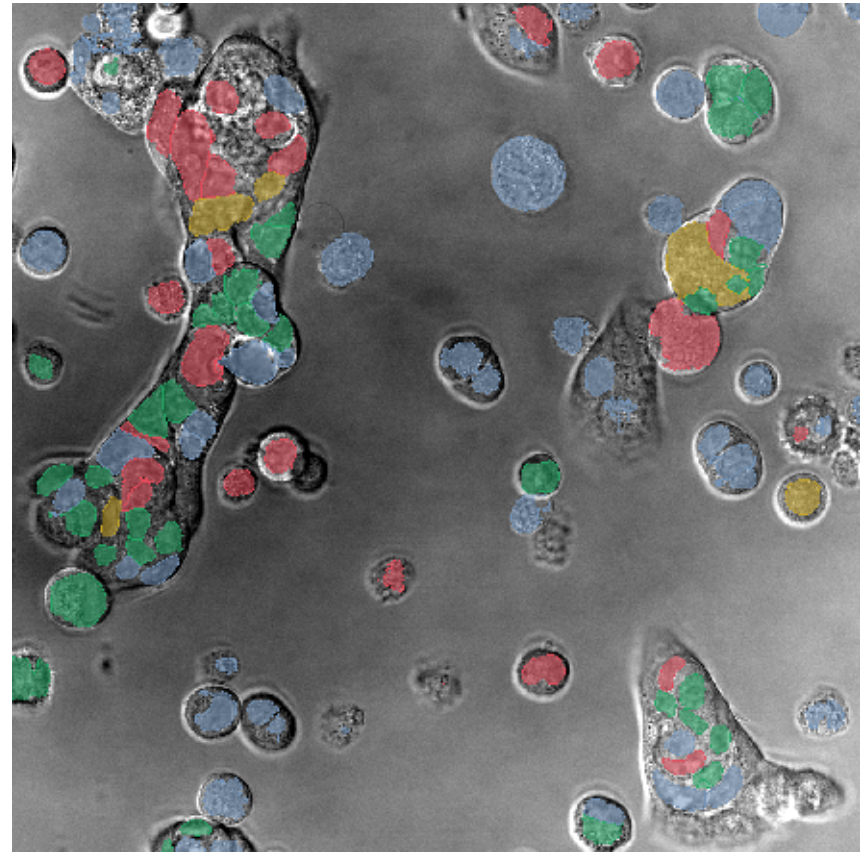

3D local fluorescence compared with fitted point thresholds. Neither = below both thresholds. No uncertainty or QC abstention.
Fixed fluorescence display ranges. Quality and stability flags remain in the exported table.

241016 / FoF5 · z=35 (zero-based)
180 intersecting labels · Green only 41 · Red only 31 · Both 5 · Neither 103

A Green + red fluorescence
White outlines: dominant components

D Forced reporter states
Every label assigned to one of four states

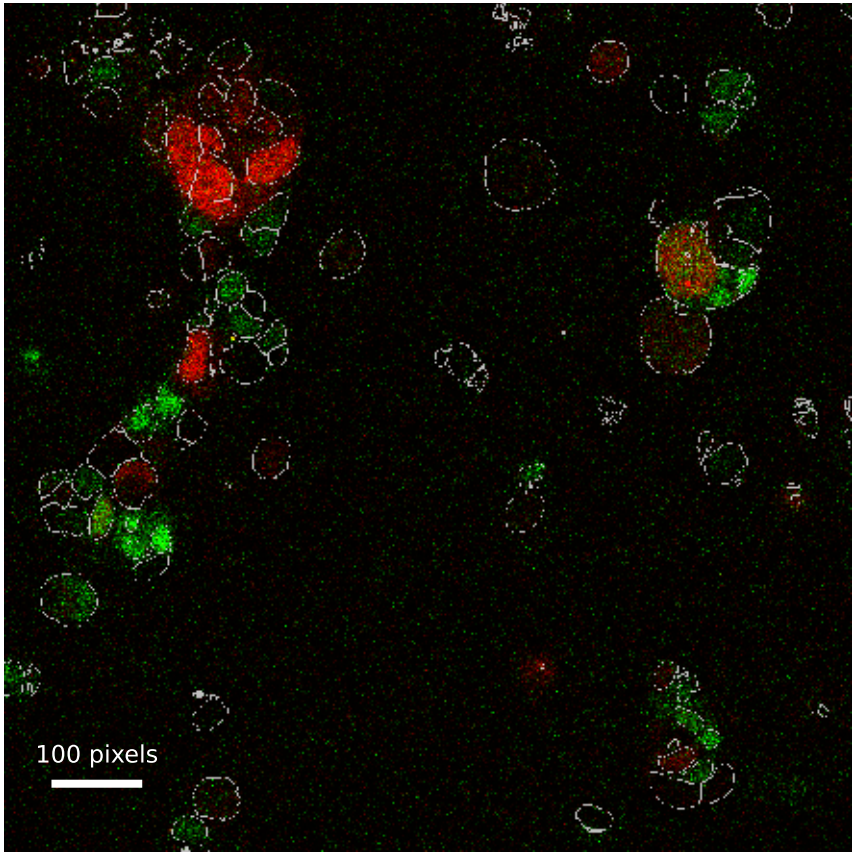

Green only Red only Both Neither

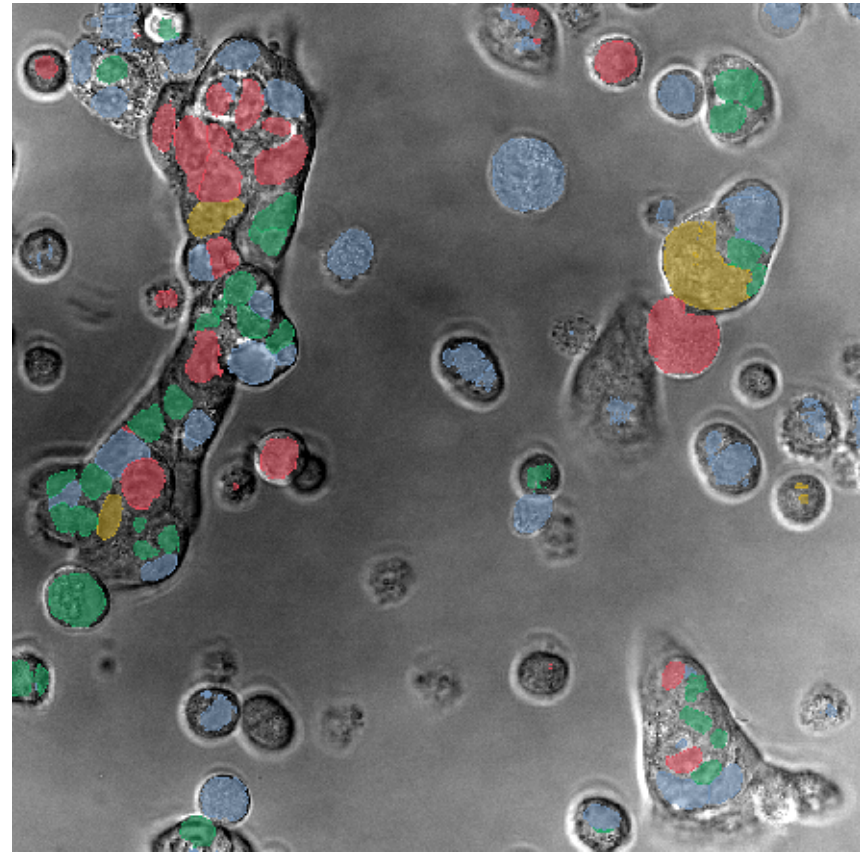

3D local fluorescence compared with fitted point thresholds. Neither = below both thresholds. No uncertainty or QC abstention.
Fixed fluorescence display ranges. Quality and stability flags remain in the exported table.

241016 / FoF5 · z=45 (zero-based)
168 intersecting labels · Green only 36 · Red only 27 · Both 5 · Neither 100

A Green + red fluorescence
White outlines: dominant components

D Forced reporter states
Every label assigned to one of four states

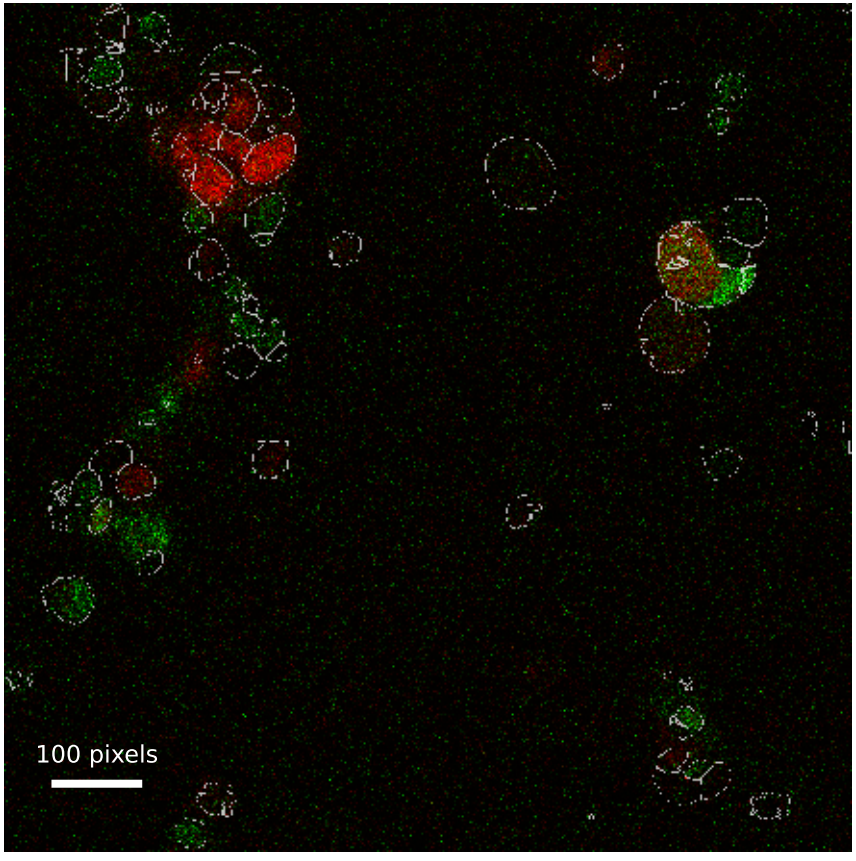

Green only Red only Both Neither

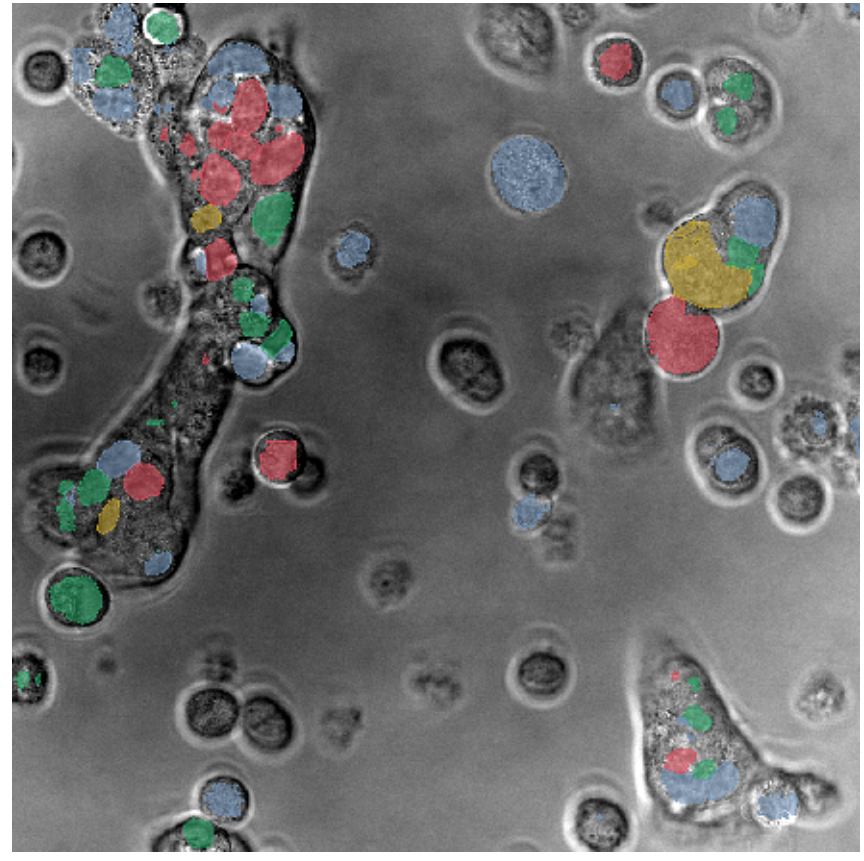

3D local fluorescence compared with fitted point thresholds. Neither = below both thresholds. No uncertainty or QC abstention.
Fixed fluorescence display ranges. Quality and stability flags remain in the exported table.

241016 / FoF5 · z=55 (zero-based)
100 intersecting labels · Green only 25 · Red only 17 · Both 4 · Neither 54

A Green + red fluorescence
White outlines: dominant components

D Forced reporter states
Every label assigned to one of four states

Green only Red only Both Neither

3D local fluorescence compared with fitted point thresholds. Neither = below both thresholds. No uncertainty or QC abstention.
