241016/14: original Cellpose label 31
Previously discussed: one large component and tiny satellites

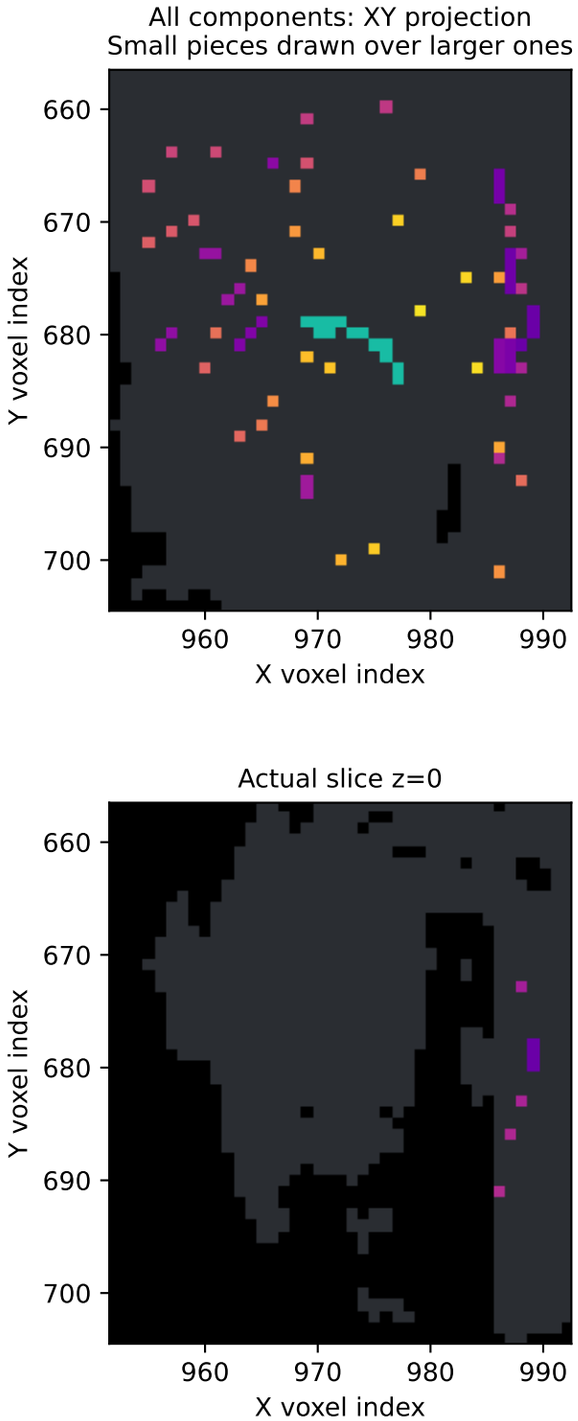

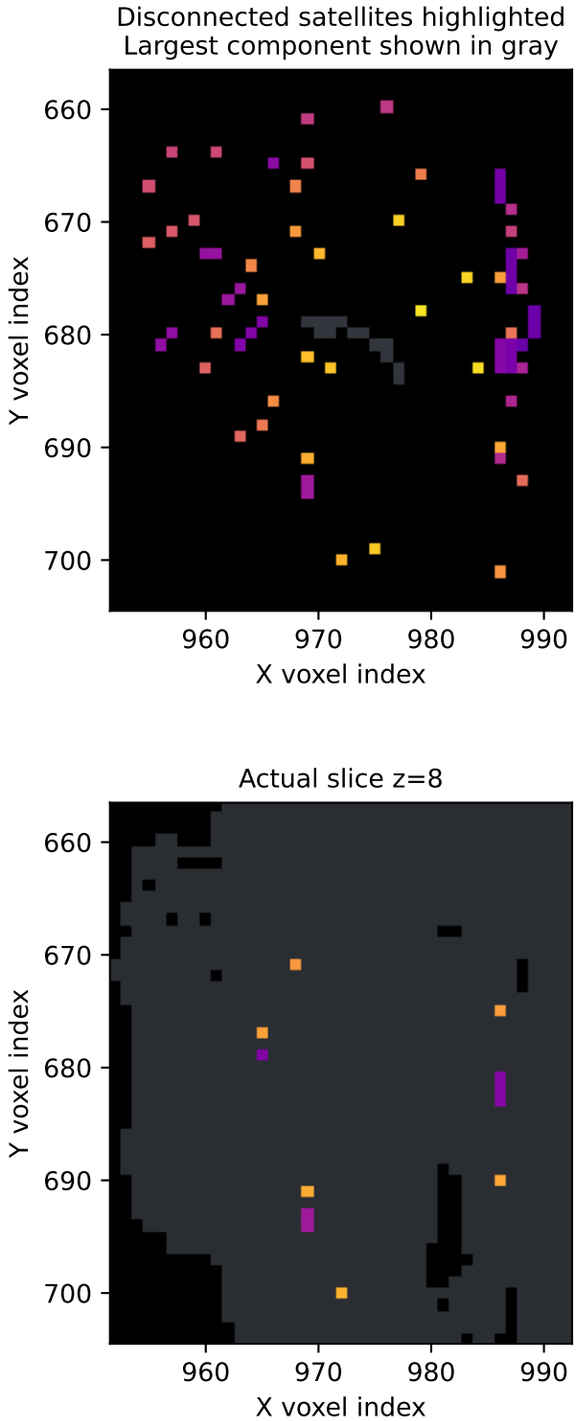

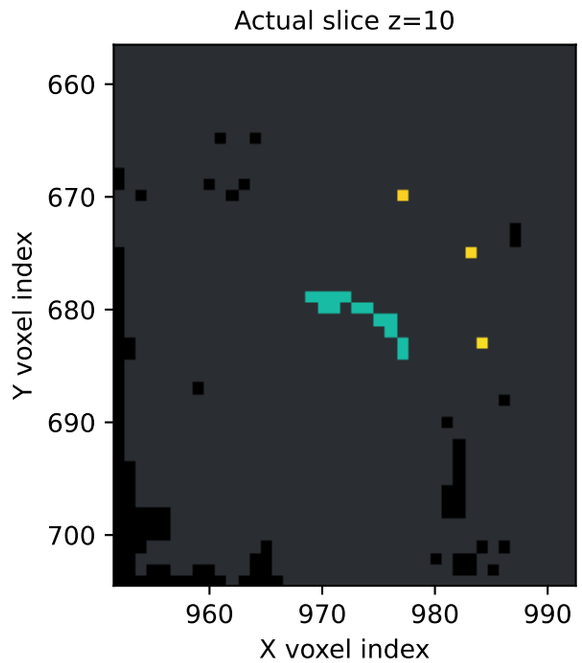

26-neighbor connectivity in 3D; colors indicate components, not cell-cycle phases. Matching fluorescence images are unavailable.

Largest 3D component | Other components: warm/purple colors | Other original labels in slice context

241016/14: original Cellpose label 92
Strongly fragmented example with little dominant support

26-neighbor connectivity in 3D; colors indicate components, not cell-cycle phases. Matching fluorescence images are unavailable.

Largest 3D component | Other components: warm/purple colors | Other original labels in slice context

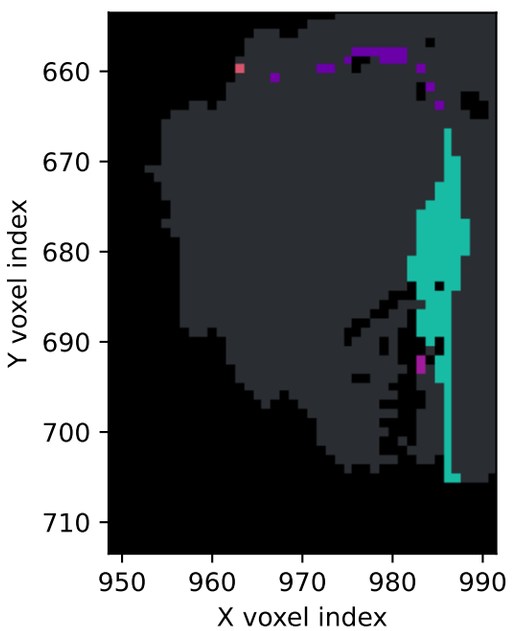

241016/14: original Cellpose label 89
Many components with a dominant but incomplete main component

All components: XY projection
Small pieces drawn over larger ones

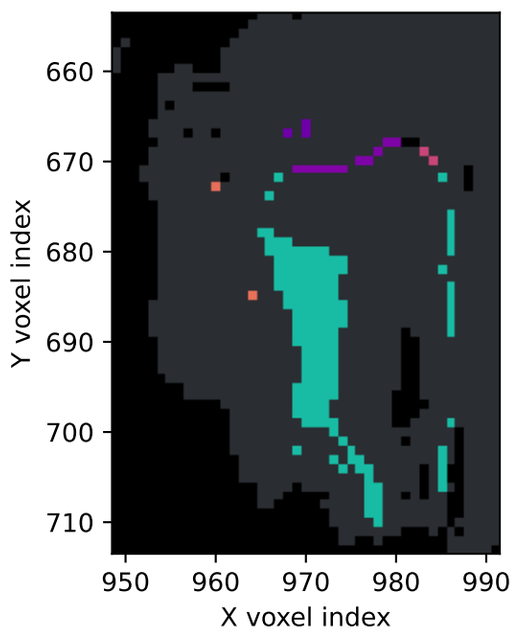

Disconnected satellites highlighted
Largest component shown in gray

73 components; 1,432 voxels total

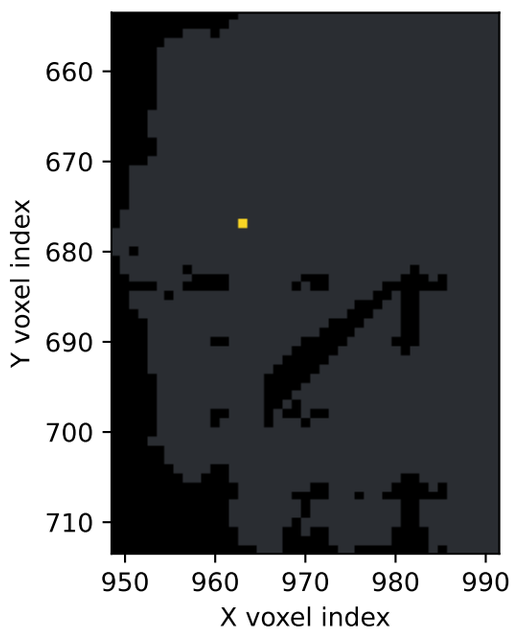

Actual slice z=1

Actual slice z=8

Actual slice z=21

26-neighbor connectivity in 3D; colors indicate components, not cell-cycle phases. Matching fluorescence images are unavailable.

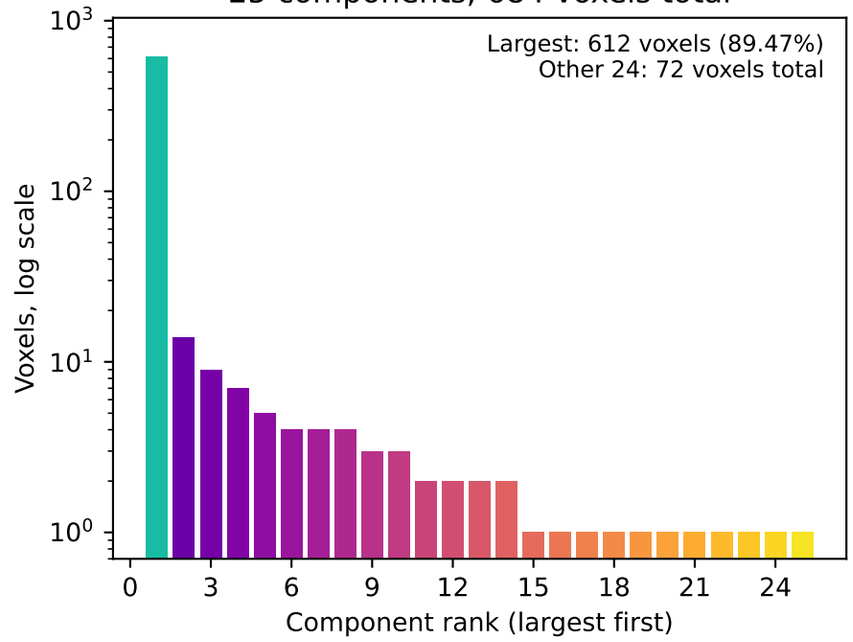

Largest 3D component | Other components: warm/purple colors | Other original labels in slice context

241016/1: original Cellpose label 250
Fragmented example from the second available mask

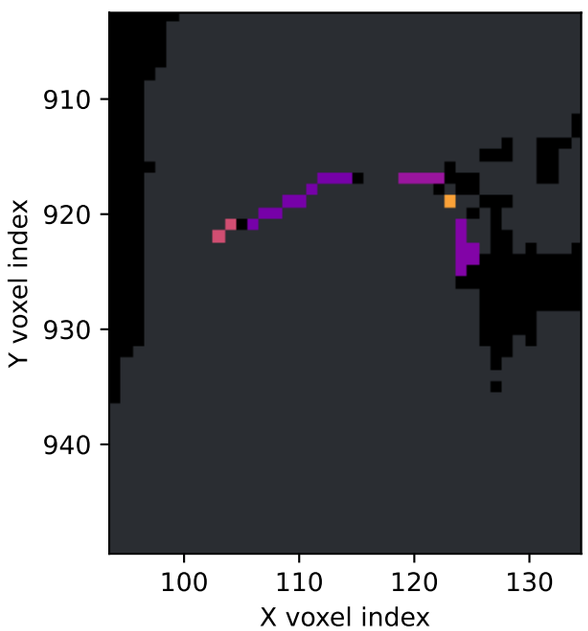

All components: XY projection
Small pieces drawn over larger ones

Disconnected satellites highlighted
Largest component shown in gray

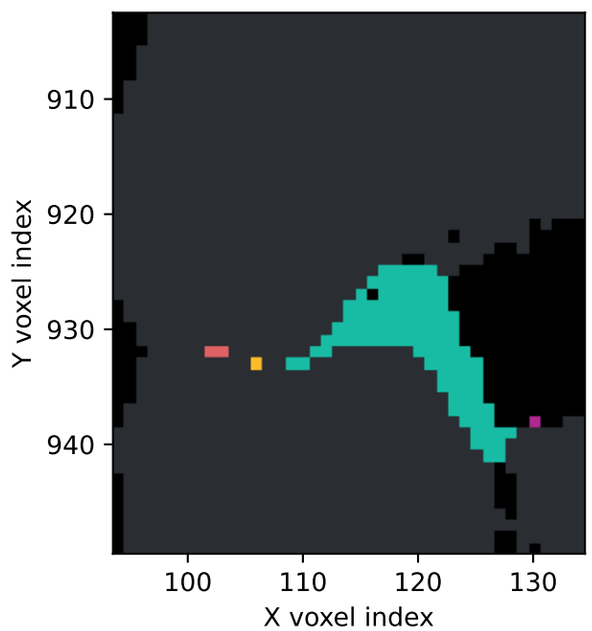

25 components; 684 voxels total

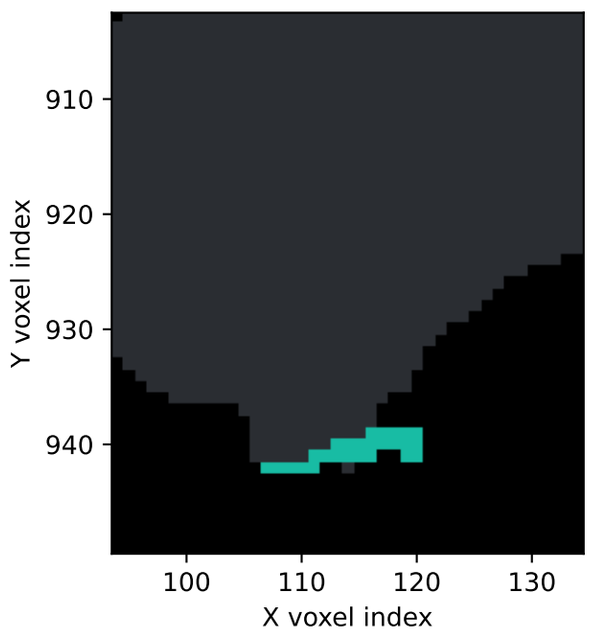

Actual slice z=42

Actual slice z=45

Actual slice z=52

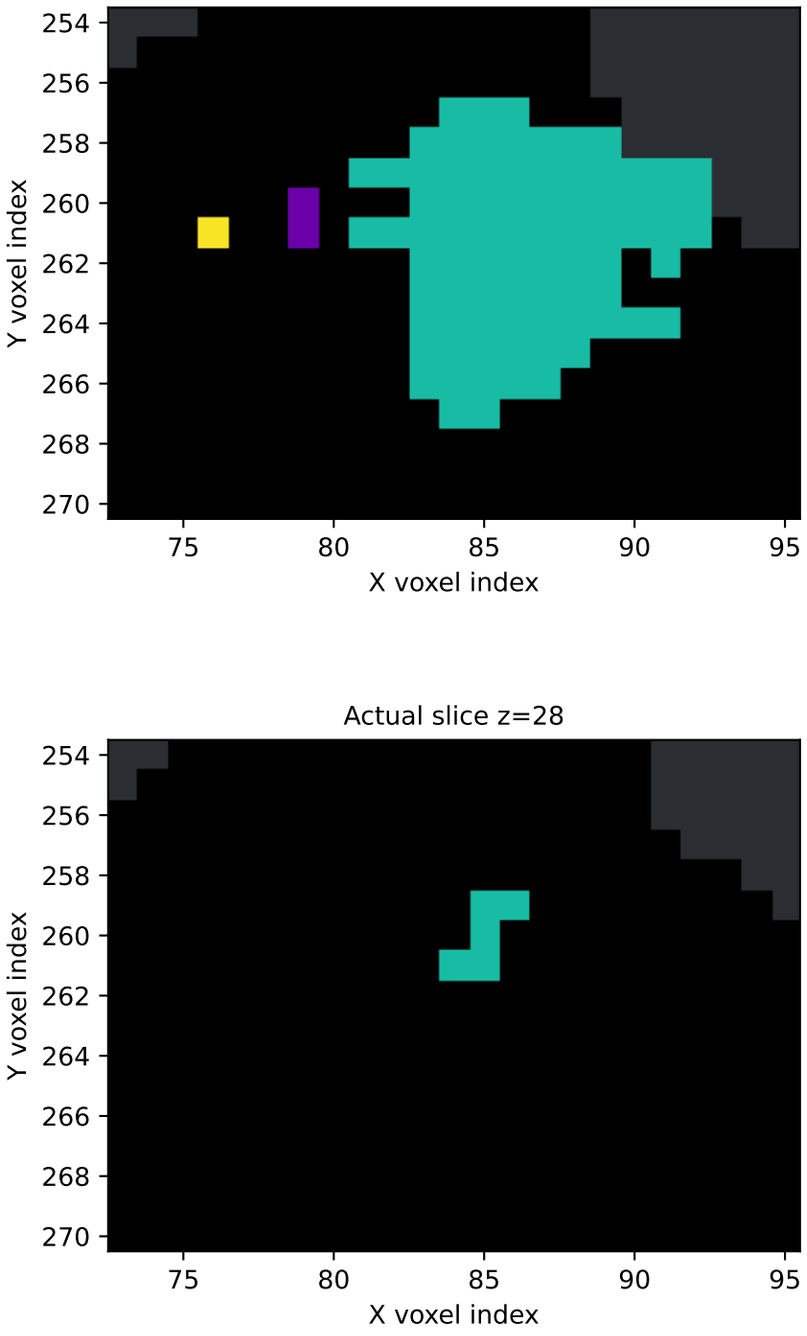

26-neighbor connectivity in 3D; colors indicate components, not cell-cycle phases. Matching fluorescence images are unavailable.

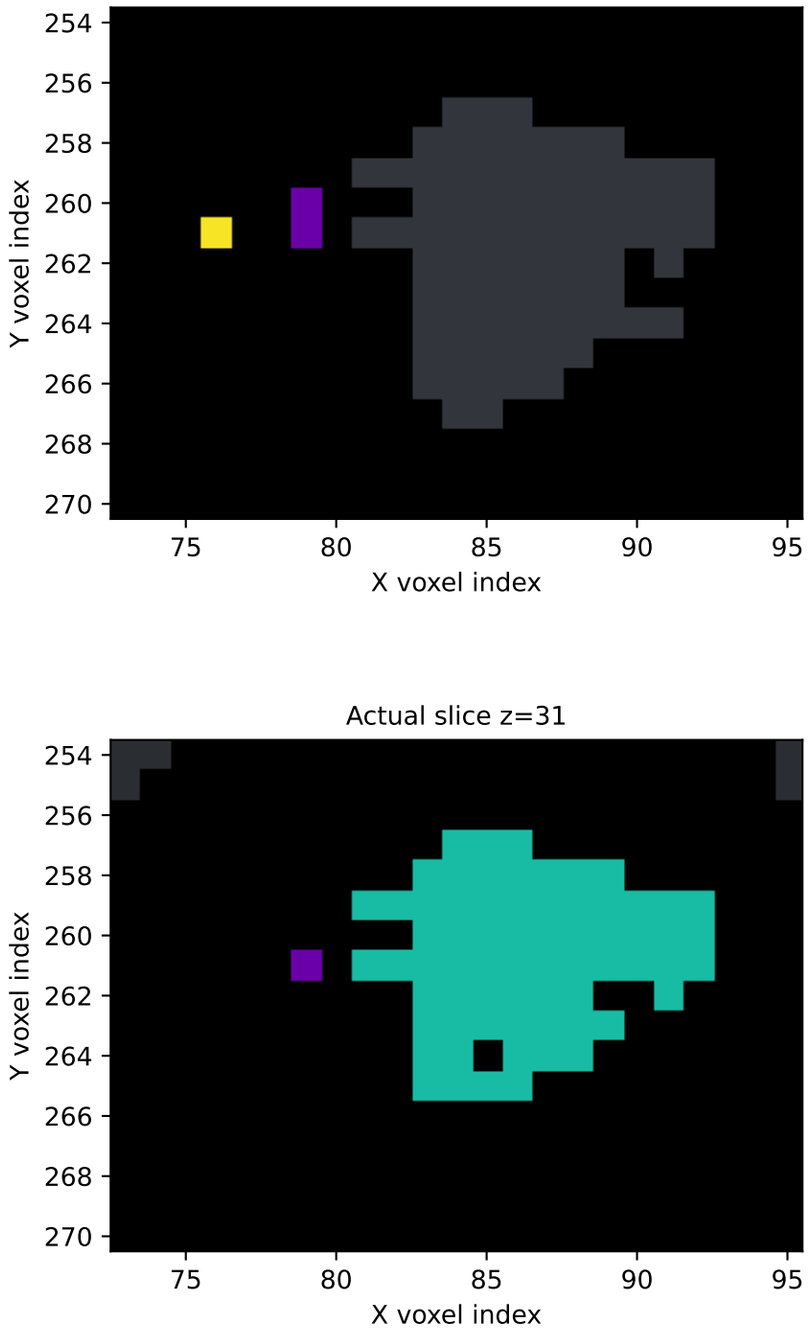

Largest 3D component | Other components: warm/purple colors | Other original labels in slice context

241016/1: original Cellpose label 201
Three components; largest fraction near the dataset median among fragmented labels

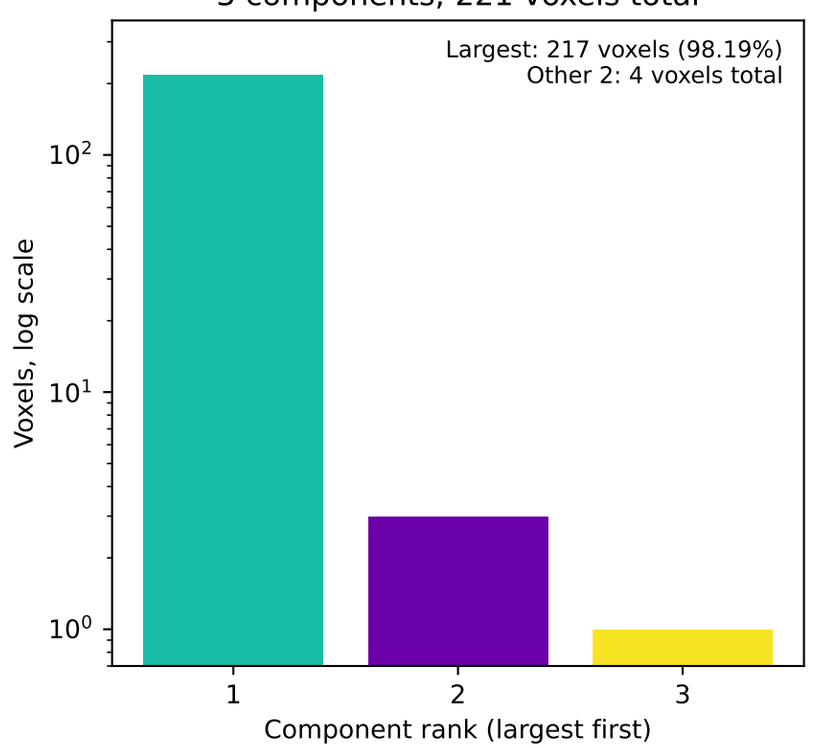

All components: XY projection
Small pieces drawn over larger ones

Disconnected satellites highlighted
Largest component shown in gray

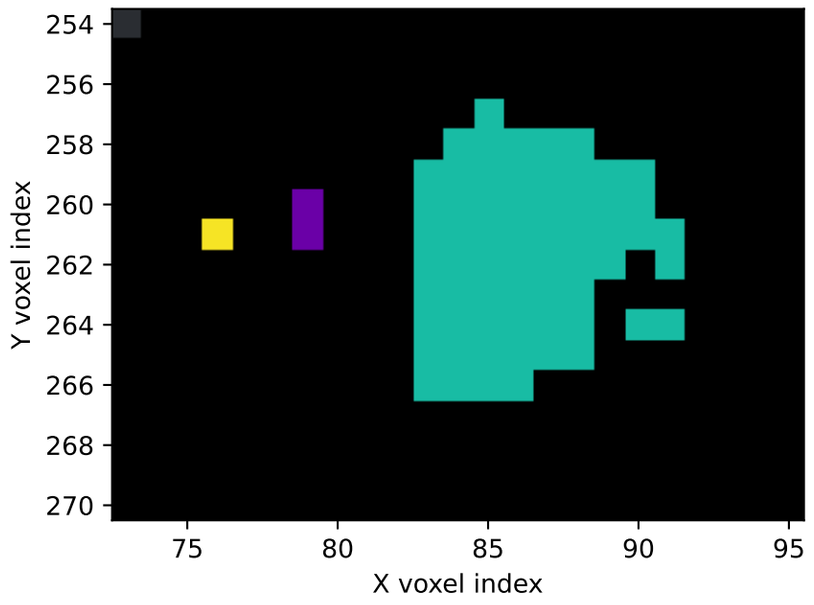

3 components; 221 voxels total

Actual slice z=28

Actual slice z=31

Actual slice z=32

26-neighbor connectivity in 3D; colors indicate components, not cell-cycle phases. Matching fluorescence images are unavailable.

Largest 3D component | Other components: warm/purple colors | Other original labels in slice context

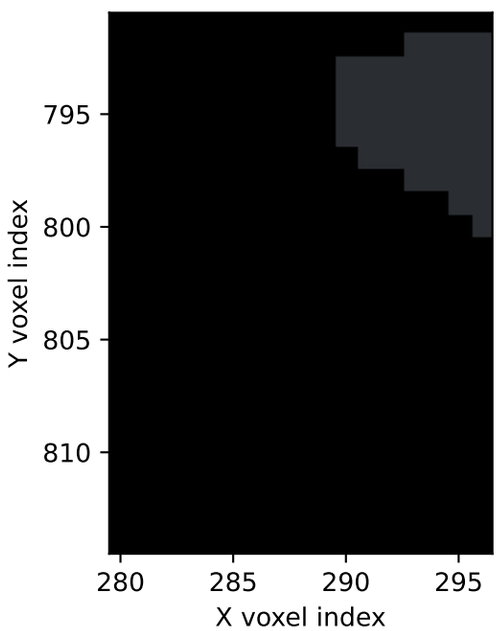

241016/1: original Cellpose label 179
Single-component example with volume near the dataset median for single-component labels

All components: XY projection
Small pieces drawn over larger ones

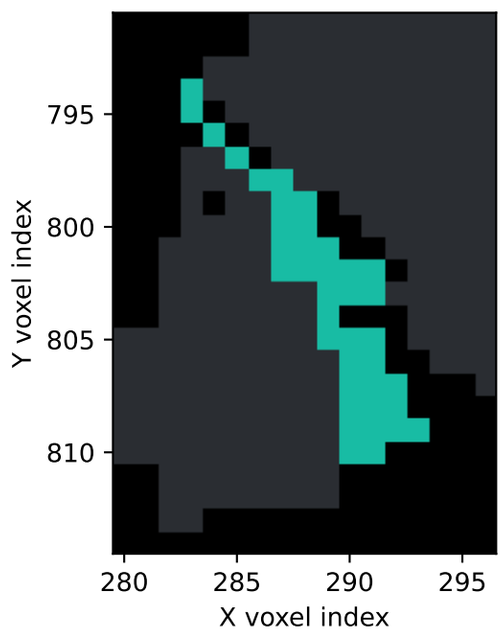

Disconnected satellites highlighted
Largest component shown in gray

1 components; 469 voxels total

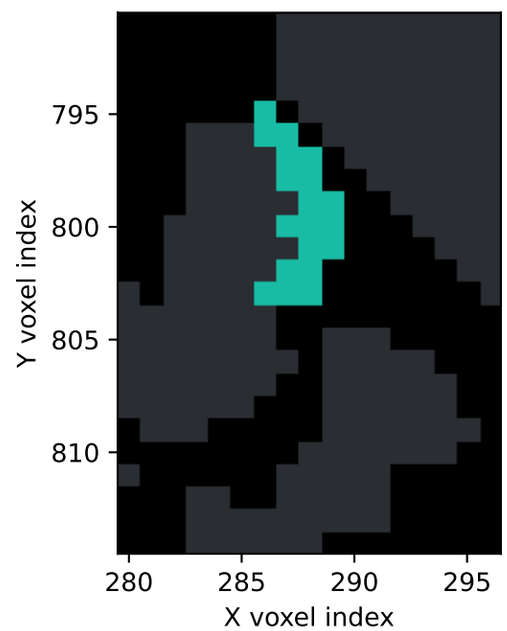

Actual slice z=16

Actual slice z=32

Actual slice z=38

26-neighbor connectivity in 3D; colors indicate components, not cell-cycle phases. Matching fluorescence images are unavailable.

Largest 3D component | Other components: warm/purple colors | Other original labels in slice context
